

# Scott River Recovery Action Plan Project (SRRAPP)

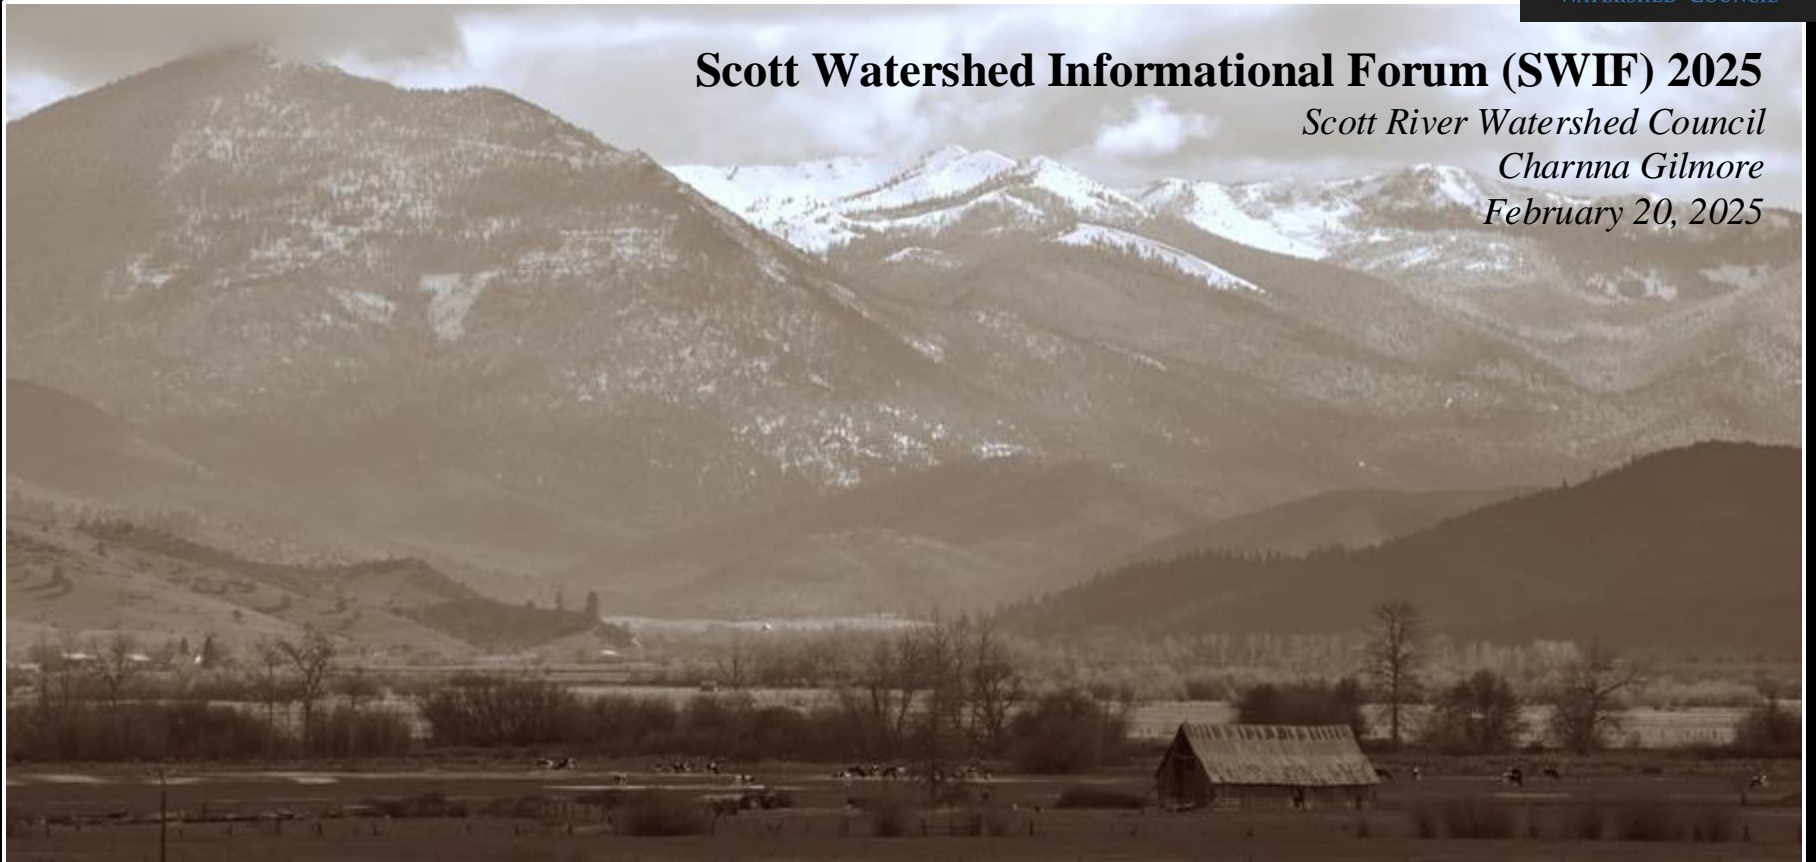

SCOTT RIVER  
WATERSHED COUNCIL

## Scott Watershed Informational Forum (SWIF) 2025

*Scott River Watershed Council*

*Charnna Gilmore*

*February 20, 2025*

This project looked at all the westside tributaries of Scott River throughout the basin

*“This plan determines locations where the most beneficial and cost-effective restoration actions for the coho population can be deployed with the limited available restoration resources.”*

*“The project was conceived of as “Phase 1” of an ongoing effort to fully evaluate and prioritize restoration opportunities in the Scott River Watershed.”*

*“This will bear fruit well into the future with a willingness and expertise to tackle large-scale, complex restoration challenges and projects.”*

---

**Restoring Priority Coho Habitat in the Scott  
River Watershed Modeling and Planning Report**  
*Phase 1 – October 1, 2018*

Etna, CA 96027

*“The Scott River Watershed Council (SRWC) has developed this plan for the Scott River watershed for the purpose of cooperatively establishing a common strategy for restoration and management actions.”*

23 Sections, including watershed history, land use, limiting factors for salmonids, and water quality, however, the following were identified as important but not fully addressed:

Channel Conditions – *“better understanding of the geomorphology of the river channel, primarily in the valley region”*

Water

Land Use

Economics

Wildlife

Fisheries (ongoing)
